

Custom Furniture Options

One of the advantages of working with a USA-based company that builds each piece by hand is we have the capability to modify any of our rustic furniture designs to perfectly fit your needs. Or, we can build something entirely unique to your specifications!

Some of our custom pieces only involve a minor modification of one of our standard items—such as changing a table top, making a chest two inches narrower, or adding antler drawer pulls. Other custom creations, such as the barnwood bathroom vanity, reception desk for a

conservation consulting firm, and the rustic hotel bar and barstools (see next page), all require more of a stretch of the imagination and unique plans.

We often do custom work when collaborating with designers and owners on our commercial and hospitality projects. However, you don't have to be an interior designer or have one working for you in order for us to offer you custom options on our rustic furniture. Just call us with your needs, or fax the drawings or plans, and we can get to work! You will be pleased with the results!

Custom L-shaped desk with antler drawer pulls

Formica detail for custom pine credenza

Custom pine table with formica top and two pine upholstered side chairs used in an Alaskan hotel
