

Wildlife Art Bedroom Series

Autumn Aspen

Aspen Glen

Horse Canyon

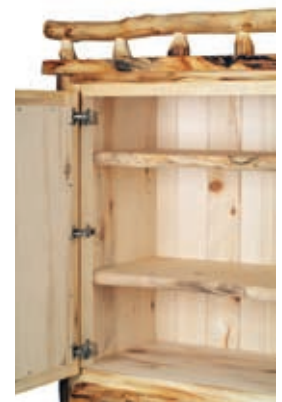

Moose

Mountain Woods Furniture proudly introduces our Wildlife Arts Bedroom series. These unique creations truly bring the tranquility of nature into your home. Crisp, colorful images of nature from premier artists nestle beautifully within the warmth and splendor of natural aspen wood. All Wildlife Arts pieces blend perfectly with our traditional Mountain Woods Furniture line, providing many possibilities for you to create an awe-inspiring, elegant rustic bedroom for your sleep and relaxation.

Our Wildlife Arts Aspen Bed will be the focal point of your bedroom. It uniquely blends our meticulous craftsmanship with the beautiful artwork of award-winning photographers and artists. And, you can rest assured that this bedroom series features the same quality construction you expect from Mountain Woods Furniture. These beds are taller than a standard bed, for that genuine log bed appeal, and also allows for an Underdresser option.

Our Wildlife Arts Armoire is an impressive and functional piece of furniture that features one of our stunning images. A single door adorns the top half of the armoire, which houses two adjustable shelves. This armoire can also be made with a TV swivel and a DVD/DVR shelf if desired. The armoire frame, sides and top are Mountain Woods' signature solid aspen with aspen log trim. The lower half of the armoire offers three generous drawers with aspen log fronts, and an aspen skirt base for stability.

Whitetail Deer*

Model numbers and dimensions on reverse side

Our Wildlife Arts Nightstands are offered with or without a drawer. Both versions have a lower shelf for storage or display space. The nightstand height fits perfectly with the height of our beds.

The imaging process uses a crisp, durable paint, not dye, to permanently apply the wildlife scene to the table top. A protective sealer is then applied and three coats of durable polyurethane for protection of the image and wood.
