

Bronze Aspen Series

Those who prefer their rustic log furniture with darker, richer wood tones can now order from the Mountain Woods Furniture Bronze Aspen series. This line blends well with many décor styles, including lodge, western or traditional.

The color of our Bronze Aspen series complements the natural tones in the aspen wood, and showcases a rich array of colors and character in each handcrafted, hand-stained piece of furniture. Table tops and flat surfaces show off the richness of the Bronze Aspen finish and enhance the color variations.

Any of our existing or customized Mountain Woods Furniture pieces can be created with the Bronze Aspen finish. Please see our catalog for specifications and details of our furniture for every room in your home or business.

All of the Bronze Aspen tops are hand-brushed with three coats of polyurethane for protection and durability, while the rest of the piece is hand-rubbed with a beeswax and linseed oil combination.
